

SMARTFIT™ SIZING

FOR COMMON CANS

Benefits of SmartFit™ Sizing

Designed for most common cans and applications. • SmartFit™ sizing won't let bag fall into the can. • Don't pay for plastic you don't need. • No wasted plastic, contributing to source reduction.

Determining the Right Can Liner

What Size Do I Need?

Can liners are measured by their length and width when laid flat.

- Bag Length = Height of your can plus 3" for overhang.
- Bag Width = Circumference of your can divided by 2.
 - Square Can Circumference = Sum of all four sides added together.
 - Round Can Circumference = Diameter multiplied by 3.14.

Will Sharp Objects or Heavy, Wet Trash Be Disposed Of?

- Yes - Choose low density can liners.
- No - Choose high density can liners.

How Much Weight Will Liners Need to Hold?

Simply estimate the average weight of a full trash can liner in your use, match it to the maximum load capacity listed in the chart for each liner that meets your needs from the previous two questions.
