

PerforMAX™

SCRUBS

Cool, comfortable performance apparel

PerforMAX's synthetic fabric is an exclusive from manufacturer Medline. This revolutionary fabric works like athletic gear to move heat and moisture away from your skin while remaining light and dry. In addition, the incredibly soft, comfortable fabric keeps you cool.

There is no reason to compromise when it comes to your scrub wear. With Dempsey's new **PerforMAX** scrubs, you get exceptional comfort and performance at a downright ordinary price.

Wicking

PerforMAX's special blend of yarns maximizes wicking. Perspiration is pulled quickly into the fabric and then moved out to evaporate away.

Construction

Don't let the softness fool you. These scrubs are structured enough to hold all your daily necessities, from cell phones to pagers to scissors to pens without sagging and bagging.

Fit

These scrubs feature a generous cut throughout, giving you freedom of movement and room for an additional layer if needed.

*PerforMAX scrubs
are much more comfortable
than other surgical scrubs and
won't fade or shrink.*
