

# THE RESTROOM IS A WINDOW TO THE KITCHEN

**“79% of U.S. adults would avoid a restaurant in the future if they encountered dirty restrooms.” - Harris Interactive 2011**

**Improve Hygiene** with “touchless” dispensing.

**Help the Environment** by reducing waste.

**Save Money** with controlled one-at-a-time dispensing.

Cleanliness and neatness of the restroom in a restaurant is a reflection on the entire operation. If the restroom is clean, neat and organized it will suggest to your customers that the kitchen is in the same condition. Likewise if it is messy, dirty and full of odors it would suggest that the kitchen is probably in the same shape. Need we say more?

## RESTROOM PRODUCTS & SERVICES

Dempsey's restroom supply services ensure your restrooms have full and functioning dispensers and the highest quality hand care, odor control and paper products.
